

INSTRUCTIONS FOR USE

Ingredients

- Microorganisms as a soil enhancer agent to recondition organic material (*Pseudomonas sp.*)
- Skimmed milk powder approx. 90 %

Storage/Durability

- Lasts for 3 months, temperature < 10 °C
- Store cool and dry
- For transport and storage avoid temperatures over 30 °C
- Use up immediately after opening!

Mode of Action

Salavida is a bacteria compound with living cells from the *Pseudomonas trivialis* strain. The bacteria multiply on the roots and grow with them. It feeds from root exudates, and produces substances itself, such as iron chelate which increases the soil's fertility and microbial activity.

The positive influence on the soil root system causes more intensive rooting with salad that guarantees a better nutrient and water uptake. Simultaneously, the stress on salad from outside influence is reduced.

Genetic Technology, Plant and Environment Compatibility

Salavida is a product free of genetic technology. Within the suggested application amount, **Salavida** is very plant-compatible and according to present knowledge has no influence on ground water or soil borne insects.

A few weeks after **Salavida** application the soil bacteria regain original balance.

Application

Guidelines for User Protection

- **Salavida** must not be reachable to children
- Keep apart from food, drinks and feeding stuff
- When applying, do not eat, drink, or smoke
- Avoid contact with skin
- When applying, wear protective clothing, protective gloves, protective glasses, face protection and inhalation protection (filter P3)
- **Salavida** must only be used according to these instructions!

Application Recommendations and Indications

Salavida should be applied in the very early stages of the plant's development. It's especially advisable to apply before planting out the young salad.

Application and Dosage

Salavida can be used with all usual application procedures.

Application Amount

- 50 g/ha
- 50 g/85.000 - 100.000 salad plants

Names and Category

Xi Can cause irritation

R36/37 Irritation of eyes and respiratory tract possible

R43 May cause sensitization when in contact with skin

Interaction

Salavida can be combined with most mineral and organic fungicides. **Salavida**'s effectiveness is not influenced by herbicides und insecticides, but copper bearing products can impair the effectiveness.

Preparing the Treatment Brew

1. Dissolve the packet in a little handwarm water
2. **Dissolve completely** for at least 60 minutes, stir often
3. Fill the container with the required amount of water and add the dissolved compound
4. **Use treatment brew immediately**
